2007 SEPT TO APRIL 2011

BTech Information Technology/Anna University, TamilNadu

Aggregate:70%

Projects

Majestic Bakery (E-Commerce Website)

Developed an Ecommerce website for bakery which allows users to buy products online. The website uses Node.js and Express.js to create a server-side application, and MongoDB to store product and user data. The application supports user authentication and authorization, as well as a shopping cart feature that allows users to add and remove items before checking out. Additionally, the website provides an admin panel for managing products, users, and orders.
